Give the audiences something to stare at with this 70" LFD display

In such a competitive world, it is necessary to stand out, and this is where the Samsung 700DXN-2 lends a hand. With built-in speakers, matrix video wall capabilities, and MagicInfo Pro for web-based server access, it won't be hard to show your superior edge. It also comes with Window XP for that extra touch of professionalism, while the picture-in-picture, picture-by-picture displays add a little fun. Enjoy!

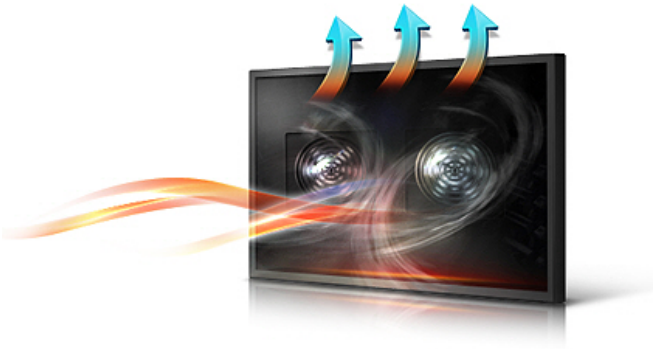
RS232C In-Out

RS232C, a standard of serial communication, is used for the communication between PC and displays. Therefore, A Multiple Display Control (MDC), helping various displays to be easily and simultaneously operated on PC, is possible with RS232C function.

Reliable, durable and dust-resistant.

Introducing a monitor that was built to stand the test of time—and dust. This Samsung LFD is durable and dust-resistant. Corner-sealing design, double-layer structure, and screw and user hole sealing add to its ruggedness. Make sure dirt and dust don’t stand in the way of getting your message out.

A cool way to ensure longevity.



Enjoy continuous, reliable operation thanks to a built-in fan control. Housed inside of the LFD, the fan guarantees you can count on it for years to come without worrying about it overheating. You can even control the fan with an easy-to-use on screen display.

Twice the information, double the impact.

Whether your presentation requires a picture-in-picture configuration or a picture-by-picture arrangement, this Samsung LFD makes it possible. When one image just isn't enough, two video signals can be viewed simultaneously for maximum impact.

Choose the right view, landscape or portrait.

This Samsung LFD gives you the flexibility to display your image vertically or horizontally—whatever the situation calls for. With a pivot function that rotates the screen 90 degrees and the freedom to display presentations in portrait mode or advertisements in landscape mode, this makes for one versatile monitor.

No separate PCs. No jumbled wires.

Control multiple monitors without having to install and run wires to a separate PC. This Samsung LFD features a powerful built-in PC. Its optional multi-network solution—purchased separately—is easy to configure through a LAN, easy to manage through server-side software, and cost-effective to run. And with optimized CPU, RAM and storage, you'll have everything you need to get your message across effectively.

A smart sensor that automatically saves energy.

Stop worrying about the lighting conditions affecting your display. This Samsung LFD adjusts its brightness levels as ambient light changes so your images are always crystal-clear. And while it compensates for low-light and high-light environments, you'll save energy and stay eco-friendly.

Save money, save space with built-in speakers.

Maximize your impact with a great picture and crisp audio. Your message will be heard loud and clear with built-in speakers. You'll save money when you eliminate the cost of purchasing separate speakers, and you'll save valuable space as well.

Brighter lights, better picture.

With an intensely illuminated DID panel your message is always in the spotlight. Its high brightness and contrast level make the screen clear and readable in public. In fact, on average it's 1.5 times as bright as TV screens. Plus with a low operating temperature this Samsung LFD will be completely reliable for years to come.

Stay in the loop with DVI-out.

Enjoy superior picture quality with a DVI-out interface that lets you share content between multiple LFDs thanks to an easier-to-connect video matrix. LFDs used to have to be connected to the PC individually, but digital loop out allows you to connect them without connecting to a PC. Better yet, the digital loop out produces a single image without any loss of quality, and there's no need for a separate video signal distributor. It's easy to install and the most cost-effective way to connect multiple displays.

An innovative solution with easy access.

Samsung’s network management software features two types: a Wan / Lan-based for local access and a web-based software accessible anywhere. MagicInfo™ lets you access your server and LFDs everywhere in the world. This optimized Samsung software solution lets you manage multiple Samsung LFDs remotely. Best yet, uploading, creating, monitoring and controlling content is more convenient and less time-consuming.

A screen that won’t shatter your digital dreams. (option)

When a monitor is displayed in public areas, things can happen. That’s why our LFD offers a specially-designed, optional protection glass. Scratch resistant and shatter-proof, it shields the panel’s surface from any damage so you can use it for years to come.
